#jakob
Your Digital Maintenance Assistant

Complex Tasks
Require Simple Tools

ANALOGUE MAINTENANCE IS INDIVIDUAL AND ERROR-PRONE

Missing documents, a poor overview of the finished maintenance tasks and status of the plant often cause problems:
"Once again, I can't find my colleague's list."
"I know I jotted down that spare part somewhere yesterday."
"Do you remember how to set this up?"

You've probably heard all that before. Sometimes, if there are so many tasks to be ticked off, it's not easy to stay on top of things. Likewise, it's not always easy to find the right information on what to do in case of an error. Manually created lists get exchanged among colleagues and departments - information is either recorded twice or gets lost altogether.

Digitization doesn't stop for maintenance, and everyone always has their cellphone at hand. This creates opportunities to improve efficiency and maintenance tasks, and to achieve consistent traceability.
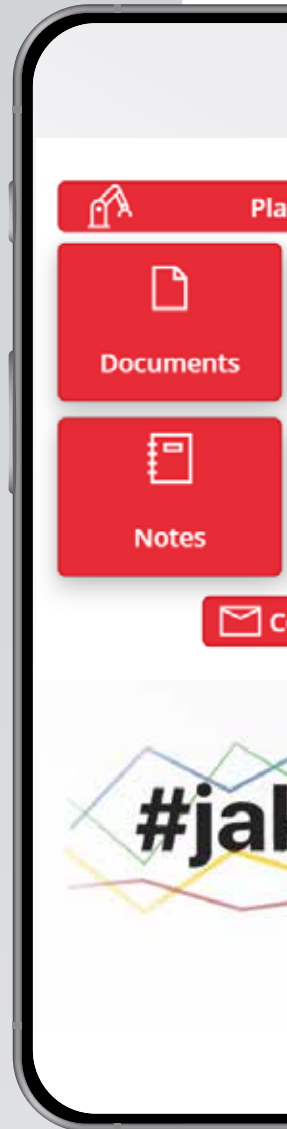

THE AICHELIN SOLUTION SIMPLE AND DIGITAL

With #jakob, special emphasis was placed on maximum simplicity in creation and operation. The simple setup allows for the integration of any existing plant into the platform-independent app, which makes it a tool that can be used for the entire maintenance process regardless of the manufacturer.

An overview of upcoming maintenance tasks helps you stay on top of things. Comments and notes are quickly and precisely available and make everyday work easier. Required spare parts can be found just as easily.

Individual adjustments can be added at any time. The simple setup helps you be ready in no time. The well-structured app has answers to the questions such as: "What are the tasks for this week, is this open item from my previous tour being dealt with, or which parts will I need for the next maintenance?"

The desktop app makes it even easier to get an overview of tasks that have been completed and those that are still open. You can create your own lists and notes, which will make your work easier, help with spare parts orders, and with sharing information.

SERVICE & MAINTENANCE

- Maintenance tasks
- Seamless documentation
- Tailored to the operator
- Easy filtering & sorting

DOCUMENT LIBRARY

- All documents at a glance
- Quick access to relevant documents
- Fast retrieval of information
 (Spare parts, malfunctions, manuals)

SPARE PARTS OVERVIEW

- All relevant parts
- Option to create lists
- Simple search function

NOTES & COMMENTS

- Simple knowledge storage
- Helpful comments in the right place
- Quick & easy to retrieve
- Intuitive image & document integration
